## **2<sup>nd</sup> Workshop**

# **Waste Management Plan on hazardous Construction & Demolition Waste**

**17<sup>th</sup> of June 2016**

# Input / questions for discussion I

- *Have the **treatment options** for the different hazardous waste streams been set in a right way?*
- *Are there additional indicators / data which should be considered to derive a **forecast** of the future situation?*
- *Is the **strategy** for management of C&D waste comprehensive?*
- *Which **additional incentives** are suitable to direct C&D waste from landfills to recycling?*
- *Are there comments on the objectives / requirements defined in the existing **draft regulations**?*

# Input / questions for discussion II

- *Are there specific comments on the defined **quality criteria** in the drafted by-law on C&D waste?*
- *Do you see advantages if **end-of-waste status** for recovered aggregates can be achieved?*
- *Which experiences do you have with **quality assurance systems / standardization** in the field of C&D waste management?*
- *What are the **main burdens** in terms of proper C&D waste management in Serbia?*
- *Which general **experiences** do you have in the field of C&D waste management?*

# Thank you!
